

Did you know about these New features?

- **VTS Guide** including exhibitor's directory (logo and description), product highlights, program and tips for attendees on how to use the platform
- **Registration** includes "country" and "stakeholder type" fields to be included in the post-event contact data report provided to exhibitors
- **Improved search function** – it will be possible to search attendees who are active online and not only exhibitors
- **Panel discussions** organised by shecco with end users, policy makers and academia to boost intellectual content of the event
- **Live webinars** including multiple speakers by manufacturers scheduled over the 24 hour period
- **More user-friendly and functional chats**
- Call notification with an **audio alert**
- Option for exhibitors to make **changes to their booths after seeing the preview design**
- **Private or public meeting room** for up to 30 people included in all booths – great for product launches and presentations
- **Zoom integration** – great for streaming exhibitor showrooms to more than 30 people at once
- **Product rendering** - when attendees click on the product integrated into the design of the virtual booth, a new window pops up with a 3D image. The platform supports gltf, glb, obj files, and it is important that all 3D files are bundled together in one bundle (gltf, glb, obj).
- **Push notifications** promoting exhibitors throughout the 24 hours
